

Items for aches and pains are no longer being routinely prescribed!

Prescribing readily available medication like paracetamol costs the NHS millions every year, adding unnecessary strain to local GPs and the NHS.

Processing these prescriptions can cost 20 times the price of buying identical medication at your local pharmacy or supermarket.

Before you contact your surgery, talk to your pharmacist. You don't need an appointment and for most minor illnesses it's faster and easier.

If you take care of the little things, your NHS can keep taking care of you
